EDUCATION

Shanghai Pinghe School Sept 2024-Jun 2027

Core courses； Biology HL (7), Chemistry HL(7), Mathematics: Analysis and Approaches HL(7), English B SL(7), Psychology SL(6), Chinese A Literature SL(6).

Predicted IB score; 43 (40+3)

Shanghai Jincai Experimental School Sept 2023-Jun 2024

Core courses: Biology (A), Chemistry HL (A), Mathematics (A), English (A), Art (A), Chinese (A).

GPA ranked top 10% at grade 9.

EXTRACURRICULAR ACTIVITIES

Shanghai Pinghe School Band, Percussionist Sept 2024-Now

-Joined the school band in grade 10, attended weekly practice and selected to join the performance for campus events like Sports Day and Open Day. Promoted to the lead percussionist in grade 11.

- Coordinated regular training and rehearsals for 20+ musician over 12+ major performance.

-Reached out to 4 other schools to host Music Night as with themed performance including 'Youth in Motion' and 'Nature of the Cities', with accumulated audience over 900+ coordinated with other schools to select theme and secured 2 long term sponsors for the events.

Shanghai Youth Orchestra, First Chair Percussionist Dec 2023-Now

-Selected out of 200+ applicants to join the team. A dedicated member who have performed consistently over 3 years, with over 10+ shows with accumulated audience over 1200 audience.

-Promoted to the first chair percussionist in 2025. Joined the management meeting as the session lead for 6+ performances. Guided the percussionist in practice sessions to improve their skills.

-Helped select pieces for performance, make adjustments on scores to better suite our band's instrumental and lineup arrangement, refine the chords for greater harmony and a strong performance outcome.

Biology Club Member, Chief Coordinator Sept 2024-Now

-In charge of coordinating 5 bio competition preparation yearly for 40+ students coming from different grade.

-Organized exam preparation sessions for grade 9&10 students, overall scores improved 11% in two years.

-Led 50+ bio-related debate sessions, with topics ranging from the ethical issues of surrogacy and the practicality of AI assisted elder care. Accumulated over 250 attendees. The session later became a legacy project.

-Coordinated resources&organized lab experiments to anatomize animal organs, such as cows' eyes.

International Genetically Engineered Machine(iGEM) Competition, Team Lead Mar- Nov 2025

-Our group focused on producing a new probiotic treatment for Parkinson's. Aimed to replace chemical synthesis with microbial synthesis and construct a more self-sufficient production pathway of levodopa.

- Our newly designed medicine solved the drawbacks of previous Levodopa pills treatment, and also provided some new benefits, like healing the intestinal bacterial colonies of patients, which are usually damaged by long term medication.

-Supervised the work in lab team, learnt to conduct plasmids amplification by PCR, transfection of genes to bacteria, bacteria colony cultivation, DNA and protein electrophoresis.

-Represented our team in 2026 Paris conference day. Led the other two attendees to set up our exhibition booth, presenting our promotional materials including our experimental model.

-Presented to over 400+ audience as the key note speaker for our group, earned the global gold prize.

Johns Hopkins University Summer School, Student June-Jul 2025

-In-depth class on nerves, muscular, renal, respiratory and digestive systems.

-Compeleted an in-depth Anatomy and Physiology course, systemically learnt about nerves, muscular, renal&digestive systems.

-Independently performed dissections of frog&rabbi, isolation of major vessels, and organ exposure.

-Able to identify anatomical structures&handle surgical instruments. Able to perform perfusion&retraction.

-Presented our findings in groups on vascular perfusion techniques and major vessel identification, with detailed documentation of lab reports.

Research Project on Cancer Immunotherapy, Student Jul -Nov 2026

- Completed a college level class on cancer immunotherapy, topics covering from components of immune system, to CAR T cell therapy and so on .
-Led a discussion on the immune system, focusing on innate vs adaptive immunity.
-Produced a research paper under supervision about CAR-T Therapy in Autoimmune Diseases.
-Inspired by how immune system intervene act as an underlying base for many different body functioning, started to explore how the maintenance of immune system can be better understood by the public, and better integrated in daily lives. Took Coursera lessons on the topic and made free downloadable notes with over 300+ downloads.

Individual Research Project, Sole Writer&HIR Prize Winner Jul-Aug 2026

-Independent studies aimed to analyze the biotech innovation bias towards extending lifespan over improving life quality for elders.
-Studied over 45 academic papers to gain an interdisciplinary insights across medical, sociological, and psychological field.
-Conducted cross-countries analysis to compare the impact of social-political policy on the issues. Report won HIR Commendation Prize.
-Shared my report in school seminars and biology club to showcase the technical bottleneck of correctly identifying 'aging' and 'healthy aging', and to share my insights on future development.
-My paper concluded that the multi-system decline of aging has been marginalized due to non-compliance with existing regulatory trials and commercial standards. And suggested possible solustions including global value measurement beyond a single market.

Pinghe Football Team, Session Leader Sept 2024-Now

-Led weekly training for 10+ team members, reached out to 3 other schools to host friendship races on quarterly basis.
-Self-studied kinesiology on Coursera and organized class materials for my football team. Hosted three sessions of learning seminars to educate teammates on pre-and post-training warm-up and rehabilitation principles. This seminars later voted to be an annual onboarding routine sessions for new members.
-Participated in campus competition, and our team won first prize.

Patient Compainion Service for family elderly, Volunteer 2024-Now

-Started accompanying my grandparents to hospitals to help them navigate through increasingly complex hospital visits, that includes lots of digital procedures and various check-ups across different buildings.
-Gained first-hand experience on administrative details of medical visits, over 12 hospitals cross 4 different districts in Shanghai.
-Later compiled my experience into a hospital visit guidebook, generated over thousands of views online.
-Reached out to paid patient companion service groups and shared the link, visited users to add on and update the file. Now with the latest version covering over 20 hospitals in Shanghai.

Huangpu Daycare Center, Volunteer Feb 2025-Now

-Volunteered as a percussion teacher, hosted 35+ rounds for 20+ elder residents per class.
-Successfully translated 20+ popular songs from older generations into percussion version, meet music well-received by the crowd and helped residents to organize in-house music show to perform songs they learnt.
-Made elder-friendly sheet music with simplified and highlighted scores for easier recognition.

HONORS AND AWARDS

International Genetically Engineered Machine(iGEM),Gold award	2025
ABRSM Performance Diploma, Distinction in percussion	2025
British Biology Olympiad, Silver (top 20%)	2025
Shanghai Pinghe School Football League, first prize	2024-2025
Shanghai Pinghe School Best Learner Award, top 15% GPA	2024-2026
Harvard International Review Academic Writing Contest, Commendation Prize (top 40%)	2026

SKILLS & INTERESTS

Languages: English(Proficient), Mandarin(Native).
Technical Skills: Office,Excel, Photoshop, programming languages SQL, Python.
Interests: Football, badminton, Chinese medicine.
